**Project Name**  
Product Filters API Extension

**Type**  
User Guide

### Revisions

V1.0.0	02/Jan/2020	Gareth Price	Initial Revision

### Summary:

This extension adds an endpoint to Magento 2 which returns a collection of all product attributes which are visible on the frontend.

#### File Location:

**`/app/code/Clearandfizzy/ProductFiltersAPI`**

### Endpoints:

#### API Endpoint:

Unsecure URL: <http://magento.local/rest/V1/clearandfizzy-productfiltersapi/get>

Secure URL: <https://magento.local/rest/V1/clearandfizzy-productfiltersapi/get>

#### Specific Store Endpoint:

Unsecure

URL: <http://magento.local/rest/default/V1/clearandfizzy-productfiltersapi/get>

Secure URL:

<https://magento.local/rest/default/V1/clearandfizzy-productfiltersapi/get>

#### Example:

To retrieve attributes specific to your store Replace `<store_code>` with the store code you wish to use.

[http://magento.local/rest/<store\\_code>/V1/clearandfizzy-productfiltersapi/get](http://magento.local/rest/<store_code>/V1/clearandfizzy-productfiltersapi/get)

Use the fields parameter to retrieve specific fields from the dataset, for example  
`"?fields=attribute_code,frontend_label,options[label,value]"`

### Unsecure URL:

```
curl --location --request GET  
'http://magento.local/rest/V1/clearandfizzy-productfiltersapi/get?fields=attribute_co  
de,frontend_label,options[label,value]'
```

### Secure URL:

```
curl --location --request GET  
'https://magento.local/rest/V1/clearandfizzy-productfiltersapi/get?fields=attribute_co  
de,frontend_label,options[label,value]'
```
